LOGO! Soft Comfort V8 – new software with new features

For years LOGO! Soft Comfort has stood for extremely simple and fast configuration. Program creation, project simulation, and documentation are all easy to accomplish using drag & drop – for the ultimate in user-friendliness. Forty-three function blocks come as standard, making programming easy. The software's user-friendly design is still unrivaled on the market, and it is one of the primary reasons why LOGO! has been used in millions of applications.

LOGO! Soft Comfort V8 – new software with new features

And now it's even better. In addition to the familiar operation in single mode, LOGO! Soft Comfort V8 now has a brand new feature – brilliantly simple operation in network mode. Automatic configuration of communication with a display in the network view, the ability to open as many as three programs at once, and the use of drag & drop to easily transfer a signal from one program to another – these are just a few of the many new and convenient options.

LOGO! 8
Simply ingenious. Simply more.

The logic module

LOGO! 8 – the new LOGO! generation

LOGO! has long been known as an intelligent logic module for the implementation of switching and control solutions in small-scale automation projects – thanks to easy mounting, minimal wiring requirements, convenient programming, and last but not least its small size. Using LOGO! Soft Comfort provides for numerous solutions which can easily be implemented in simple machines or systems, in building automation, or in a wide variety of applications in many sectors.
LOGO! 8 – Integrated functions

**Integrated web server – it couldn’t be easier**
- Integrated web server is an attractive feature that saves a lot of time and effort.
- Access to the web server is possible via any web browser.
- The LOGO! 8 TD function key provides a direct link to the web server.
- The web server allows the user to configure the LOGO! 8 easily.

**Basic functions**

- Display with a new look and feel
- Integrated web server – it couldn’t be easier
- New text display
- New software in a new design
- LOGO! everywhere

**Data Log-Profile**

- LOGO! 8
- LOGO! 6
- LOGO!
- LOGO! Basic Unit

**Constants**

- Signal
- Constants
- Characters
- Date
- Time
- Status
- Fault
- Bootstrapping
- Open connector
- Flag
- TIME
- Status 1 (high)
- Status 0 (low)
- Shift register bit

**Integrated functions**

- LOGO! 6 –
  - NOT
  - OR
  - NAND (Edge)
  - NAND
  - AND

**Display with a new look and feel**

- A new 6-line display with 16 characters per line means a display with a new look and feel.
- Selectable white, orange, and red backlighting for many applications.
- Display features a new look and feel.
- Display with clear operator information and fewer diagnostic options via the display.
- Eight basic units for all voltages, with or without display.

**New text display**

- The new LOGO! 8 TD function key allows the user to configure the LOGO! 8 easily.
- Status 1 (high) and Status 0 (low) are clearly visible.
- Improved display with six lines and 20 characters per line now has more than twice as many characters as before.
- The new LOGO! 8 TD function key allows for messages in plain text.

**New software in a new design**

- The web server is easy to configure via a web browser.
- Up to three programs can be displayed side-by-side.
- Automatic configuration of communication and display on the web server.
- Intuitive program creation and configuration of the many features, easy-to-use software, and many connections.

**LOGO! everywhere**

- Supernova and Hematocrit, again, again.
- In the world of applications, LOGO! 8 can be used in a multitude of applications.
- The web server is easy to configure via a web browser.
- In industry, LOGO! 8 is used in transport equipment, elevators, and large-scale systems.
- In infrastructure, LOGO! 8 is used in heating/ventilation, air-conditioning, and many more.

**Basic functions**

- Display with a new look and feel
- Integrated web server – it couldn’t be easier
