**BD Busway**

**The Foundation of the Busway Industry**

**SUPERIOR PERFORMANCE FOR 70 YEARS AND COUNTING.**

When you need a power delivery solution for all types of applications in industrial, automotive or commercial construction environments, Siemens BD Busway has set the industry standard for excellence for more than 70 years. Introduced in 1932 by Bulldog Electric, this standardized and versatile product has a track record that includes thousands of installations still in operation today.

The key strength of BD Busway is its design, which remains unchanged through the years and will continue to be maintained for the future. This means that you can order additional busway years from now that is 100% compatible with your original installation. In addition to a stable design and a history of longevity, BD Busway offers you important advantages. Available in 3-phase 3-wire or 3-phase 4-wire configurations, BD Busway is furnished with an air-insulated design. A perfect solution for demanding, continuous loads, BD Busway can be widened in ampacities ranging from 225A to 1600A for rugged performance in a number of applications. This level of performance has earned BD Busway the distinction of being a standard specification for many Fortune 500 companies across the United States.

**IMMEDIATE AVAILABILITY TO MEET YOUR QUICK SHIP NEEDS**

For optimal availability, Siemens maintains BD Busway stock of standard components like plug-in straight lengths, elbows and cable tap boxes, through a warehouse system that can deliver your busway needs within 72 hours. In addition, for larger projects, Siemens engineers provide you with complete layout drawings and step-by-step installation instructions, making BD Busway installation faster and easier than ever. Need a busway solution for major busway installations? BD Busway can be engineered to your requirements and shipped in accordance with your construction schedule.

 jeweled bus bars over entire length

- Unique air-insulated design
- Proven reliability for over 70 years
- Maintained as stock item to meet quick ship requirements
- Ideal for any scale applications for long-term performance

The BD busway system offers a complete line of standard bus plugs available from 15A to 600A, with circuit breaker or Vacu-Break fusible switches. Custom designed capacitor and lighting contactor bus plugs are also available to meet specific application requirements.

- Circuit Breaker Bus Plugs: 15A – 800A
- Fusible Plugs: 30A – 600A (Vacu-Break Switch)
- Capacitor Plugs: 5-15 kVA
- Lighting Contactor Plugs: 10 kVA
- Ground Detector and Potentializer Plugs
